WE ARE THE MAKERS
OF YOUR SUCCESS

The transparent plastic screens with modern airy design are intended for indoor presentation of your products – placed either on the floor or on the shelves. The system has a high variability since our customers are enabled to choose the appearance of the basement of the screen as well as the height of the particular floors. The screens are characteristic by their airy design, good visibility of presented products from all sides and easy manipulation. Illumination with the highlights to raise the attractiveness of the products is a matter of course just as an application of commercial stickers to put your brand on the map. Please, contact us to see the positives of our screens.

ELEKTRONIC DISPLAYS

The most recent specialization of our activities in POP field relates to the electronic media. These media represent an original innovative presentation possibility using electroluminescent, mechanical and lenticular displays. Movable light advertisement offers the alignment of functional parts together with aesthetical look by using modern technologies. An animated surface catches the eye of your customers and it is able to display more information about the product in a more a interesting way.
