

WE ARE THE MAKERS
OF YOUR SUCCESS

The transparent plastic screens with modern airy design are intended for indoor presentation of your products – placed either on the floor or on the shelves. The system has a high variability since our customers are enabled to choose the appearance of the basement of the screen as well as the height of the particular floors. The screens are characteristic by their airy design, good visibility of presented products from all sides and easy manipulation. Illumination with the highlights to raise the attractivity of the products is a matter of course just as an application of commercial stickers to put your brand on the map. Please, contact us to see the positives of our screens.
